BANCO DO BRASIL

PB

Concremat

Others - 50-60 people representing all the authorities.

Short presentations were made by Concremat, Sec. Transport Rio and PMM.

Chapter Chairman Hugh Oliver commented regarding a specific example of a recent situation relating to Ventura Petroleo that would have been benefited had a cargo airport been available in Macae.

It was decided to explore this project without the need for moving out residents in an area close to the end of the runway which would allow for a longer strip.

It was unanimously agreed to go ahead with a strip of 2100 mts and not rehouse the population to gain space to lengthen the strip, as all understood that arriving (loaded) planes needed less distance to land than lighter planes needed to take off.

A decision was taken by the Minister to go ahead with a full study for a new airport with cargo capabilities to include a 2.1 km runway and 2 x chopper landing strips and a customs bonded area.

The meeting was closed after approx 30 mins. Full details of the meeting and the discussions were reported in local newspapers.
