OSHA: EVERY \$1 SPENT
ON SAFETY HAS A RETURN
ON INVESTMENT OF \$4-6

The reality of oil & gas risk management

- repetitive data entry
- resource-intensive
- high latency
- unverifiable

OpsLock helps Oil & Gas get rid of the repetitive checklist-style paperwork, while providing managers with real-time insights into workforce productivity and risk: empowering management intervention **before** warnings become disasters.

Oilfield Native.

Inconsistent Internet Connection? Still Works.

Designed for operations in harsh, remote, and hazardous environments.

Intrinsically Safe options Available.

Opslock isn't just a HSE Solution,
but we're starting where other solutions have fallen short.

timeline

traction highlights

Real software being used in real offshore oil and gas worksites

Inbound interest from offshore drilling contractor - 35 Active Rigs - Potential 2.6M ARR. Discussions ongoing.

Ongoing C-Level discussion with C-Level executives of a Scandinavian Oil Major about implementation throughout their company

Ongoing discussion with major LNG Terminal operator - who was so desperate that they were in the process of hiring a software company to develop a proprietary system when we connected.

Ongoing discussions with Houston based drilling contractor to help them meet the requirements of an upcoming tender for the worlds largest LNG producer

for a notoriously slow industry we've been astonished at the level interest and access our small team has been granted.
